授業の目的

This course is designed to have 1st-year nursing students attend to the development of their English communication skills, with particular focus on presentation skills. By practicing a variety of communicative techniques through listening, speaking, reading, and writing, the students will gain sufficient knowledge and confidence to enable them to present effectively in English.

授業の到達目標

Having gained insight in relation to a number of worldly topics, the students will work on their English listening, speaking, reading and writing skills. This will enable them to deliver a presentation of high-quality English expression.

授業の進め方

Wide Angle 3 embodies a four-skills integrated approach. As such, the students will be guided through the learning of vocabulary, checking of comprehension, and listening practice before proceeding to independent writing tasks, and, from time to time, presentation tasks, to be completed outside of the lesson.
